COMPUTER SKILLS

LANGUAGES

- Proficient in C#, MSSQL, HTML, CSS, ActionScript 3, XAML, JavaScript, jQuery, Bash, Go Templating, C ++
- Familiar with: C, React

TOOLS

- Blender, Unreal Engine, Unity, Maya, Adobe Creative Cloud, VS Code/ Visual Studio, Microsoft SQL Server Management Studio, Fiddler, AWS, GitHub, Bitbucket, SourceTree, Asana, Telerik, NodeJS, .Net/.Net Framework, Hugo Static Site Generator, VM Box

OPERATING SYSTEMS

- Windows, macOS, Linux

Experience

May 2023 – Current
Developer, Boise State GIMM Department
On-site
I have been working with the Boise State GIMM Development team. It is a student-led team that works with clients to develop software for clients. We have been working on React and Unity projects this Summer.

I was one of the leads for a Unity AR project working on a project for Freeman. We built a touring app for downtown Boise. This app involved Image anchors and plain detection to show artifacts related to locations. These artifacts would help tell the story of Boise and the people and companies here. Now this fall I will be expanding it for the City of Boise to include the parks system.

January 2023
Student Mentor, Boise State Onramp
on-site
As a student mentor, I have the opportunity to help the community of Boise by teaching at-risk and underprivileged students through Onramp. We go into classrooms and libraries and give demonstrations and lessons on technologies most students don't get access to. These can include AR, Art, programming, and other skills.

One of the classes I have had the privilege to teach is a Robotics course that uses block programming to move Sphero robots. We teach this through short lessons where we teach an important skill such as loops or communication between 2 robots. These classes have helped me grow as I have had to improve my communication skills to teach lessons I helped create.

September 2019 – September 2022
Junior Developer, Best Day HR
On-site
I had the opportunity to work on a small team to develop web applications that helps companies and local municipalities manage their employee files, engagement, and relation's cases.

The web applications utilize .Net Core 3.1, .Net Standard 2.0, and .Net Framework 4.7.2. The applications are developed using Razor Pages with fully modularized view components. Each View Component uses an MVC style with jQuery AJAX calls to communicate and retrieve data from their controller. The controller talks with the data access layer to retrieve information from a Microsoft SQL Server database that is hosted in Microsoft Azure. The application is protected using cookie

authentication and email authentication from Auth0. Within the application's view components and controllers, we implement a policy authentication system to restrict access based on user roles.

We also tested how the UI responds and if the functionality is as expected for everything that we implement in the web applications. This is an integral part of development as it allows us to have confidence in what we are building and ensure security and functionality.

Fall 2021 Semester
Senior Project, Boise State GIMM Department
Remote and on-site
In my final two semesters, I had the opportunity to work in a small group to build an augmented reality (AR) mobile application for the Boise School District. This application is a tool used to teach students with learning disabilities how to maintain proper social distance and ride a public bus. This was achieved using minigames within the application.

My contributions to the group were being the leader for the AR side of the project. As the principal AR developer, I created the direction and design plan that was implemented in the application. I was also the primary developer for the AR minigames within the project utilizing Unity and C# for development.

Education

Fall 20 22 – Current (Est. Spring 2025)
BACHELOR OF Science,
Computer Science
BOISE STATE UNIVERSITY

COMPLETED CLASSES

- CS 221: Computer Science
  - Java

TAKING CLASSES

- CS 117: C++ Development
  - C++
- CS 253: ECE 330: C Development
  - C
- CS 331: Computer Security
  - Computer Security

Fall 2017 – Fall 2021
BACHELOR OF ARTS,
GAMES INTERACTIVE MEDIA AND MOBILE TECHNOLOGY
BOISE STATE UNIVERSITY

COMPLETED CLASSES

- GIMM 100, 200, 330, 370: Digital tools for 3D and 2D animation
  - Adobe Creative Cloud, Maya, Blender
- GIMM 110, 250: Visual and interactive storytelling
  - Adobe Creative Clout, ActionScript 3
- GIMM 270, 360: Audio-video development
  - Chuck, Unity, C#, Chunity
- GIMM 280: Interactive Physical Computing using Arduino and C
  - C, Arduino/breadboard computing.
- GIMM 290: Game Theory
  - Game Theory, Game Design, Storyboarding
- GIMM 300, 310: Web and Mobile app development
  - HTML/CSS, JavaScript, Unity, C#

- GIMM 350: Game Development
  - Unity, C#
- GIMM 400: Multiplayer Game Development & AI
  - Unity, C#, Unreal engine, Pun 2, Machine Learning, State Machines
- ITM 225: Object-Oriented C# Programming
  - Visual Studio, C#
- ITM 305: Networking and network design
  - Microsoft Visio
- ITM 325, 370: Web and mobile app development
  - Visual Studio, HTML/CSS, XAML

Minor, History
BOISE STATE UNIVERSITY

COMPLETED CLASSES

- HIST 121: Asian Civilization
- HIST 151: Islamic Civilization
- HIST 336: Jacksonian America 1800 – 1850
- HIST 339: Us Military history 1775 – present
- HIST 397: Boise culture and public arts
- ANTH 103: Intro to archaeology
- ANTH 216: Magic, witchcraft, and religion

INTERESTS

- I play Dungeons and Dragons: I have been an active player in the DND club at Boise State since 2017. In 2019 I became a certified dungeon master for the club where I hosted a home-brewed campaign.
- I play casual Magic the Gathering: This is a newer Hobby that I picked up in 2021. I mainly play EDH with friends. My favorite commander to play is Tiamat, as it was the first deck that I built.
- I am a non-competitive PC gamer, with my top games right now are Balders Gate 3, Stardew Valley, and Minecraft.
- I have always been interested in and involved with music. I played guitar in a band that I formed with my siblings. While I was in the band, I was able to play different events, including one that took me to San Francisco. The band disbanded as we all started going to college. I still play my guitar and am very much a music lover.
